

III. In the Specification (Clean Sheet)

Paragraph on page 3, line 23:

Any flagella-less *Campylobacter* strain can be used for raising antiserum. Especially those flagella-less *Campylobacter* strains that have growth-rates comparable to wild type strains are preferred. A very suitable flagella-less *Campylobacter* strain for raising antibodies has been described by Wassenaar, T.M., Bleumink-Pluym, N.M.C. and van der Zeijst, B.A.M. 1991, in the EMBO Journal 10:2055-2061, hereby incorporated by reference.
